

PRO SERIES
MODULAR CARGO RACK SYSTEM
SKI-DOO® REV XS™/XM™ APPLICATIONS

Introducing the new *PRO SERIES* modular cargo rack systems from Up North Technologies.

Engineered exclusively for the Ski-Doo® REV XS™/REV XM™ platforms, the new *PRO SERIES* rack models feature an innovative design that provides for easy installation, superb functionality, and unmatched appearance!

*Representing the next generation of **PRO SERIES** Modular Cargo Rack Systems, these new models feature all of the design elements of the original, while adding several enhancements that will maximize versatility and ease of use. A new, over-the-tailight design provides for additional cargo capacity, while allowing longer items to safely extend beyond the rear of the sled. A new mounting system design now features slots that will align with the pre-drilled holes in the tunnel of every Ski-Doo® REV XS™ and REV XM™ model, providing for an easy, no-drill installation!*

The new *PRO SERIES* cargo rack systems are engineered for a perfect fit on every Ski-Doo® REV XS™/REV XM™ model!

Cargo deck surface is elevated above the tunnel and heat exchanger, eliminating exposure to heat, moisture, and abrasion

Precision CNC fabricated from a single sheet of 1/8" aluminum plate for high strength and light weight

Mounting slots in the rack align with pre-drilled holes in tunnel for an easy, no-drill installation

Industrial quality powder coat paint finish features Yellow Chromate pre-treatment for maximum durability and superb appearance

Formed crossbars provide for a high strength cargo deck surface, and the open design minimizes snow accumulation

Over-the-tailight design provides for increased capacity and safer transport of longer cargo items

Angled slots along each side provide additional tie down locations for securing cargo

Multiple sets of pre-drilled holes along each side and on the cargo deck surface provide for customization and easy mounting of additional accessories

PRO SERIES Model SD-146-XM shown.

PRO SERIES modular cargo rack systems feature:

- **PREMIUM QUALITY CONSTRUCTION.** CNC fabricated from 1/8" aluminum plate for high strength, light weight, and premium quality.
- **INDUSTRIAL-GRADE POWDER COAT PAINT FINISH.** Features a Yellow Chromate pre-treatment along with a textured black powder coat paint finish for long-lasting durability and superb appearance.
- **ELEVATED CARGO DECK.** The unique design of the **PRO SERIES** racks support cargo bags above the heat exchanger and tunnel, protecting them from abrasion, excessive moisture, and heat. The open design of the cargo deck also allows snow to pass through, helping to keep cargo bags dry.
- **CUSTOM FIT.** The new **PRO SERIES** racks are available for application on all Ski-Doo® REV XS™/REV XM™ models, each contoured around the fuel tank and over the taillight housing for a factory-quality fit and appearance. This feature also provides for maximum storage capability on every model.
- **OVER-THE-TAILLIGHT DESIGN.** The new **PRO SERIES** racks feature a design that extends over the taillight housing. This provides for additional cargo capacity, while allowing longer items to safely extend beyond the rear of the sled without damaging the taillight housing.
- **EASY, NO-DRILL INSTALLATION.** The new **PRO SERIES** cargo rack systems feature slots machined into the mounting flanges that align with the pre-drilled holes in the tunnel of every Ski-Doo REV XS™/REV XM™ model. This provides for an easy, no-drill installation process.
- **MODULAR DESIGN.** The **PRO SERIES** racks feature multiple sets of pre-drilled holes along each side and the cargo deck surface. These can be used to mount additional accessories, allowing for future expansion and customization. Please visit the Up North Technologies website for details on available accessory products.
- **1 YEAR LIMITED WARRANTY.**
