X3 TRIPLE LINQ™ ADAPTER SYSTEM
(SKI-DOO® REV™ G4 SUMMIT™ APPLICATIONS)

X3 TRIPLE LINQ™ ADAPTER SYSTEM INSTALLED ONTO
 SKI-DOO® REV™ G4 SUMMIT™ SP 146

Introducing the new
X3 Triple LINQ™
Adapter System.

Add the functionality and convenience of 3-position LINQ™ accessory compatibility to Ski-Doo® REV™ G4 Summit™ sleds!

Fabricated from CNC machined aluminum extrusions and stainless steel shafts, the new X3 Triple LINQ™ Adapter System has been specifically designed to provide Ski-Doo® REV™ G4 Summit™ models with an additional – and retractable - LINQ™ attachment location! The X3 creates this capability by providing two independent LINQ™ attachment plates coupled to a parallel rail system, allowing them to be quickly moved in or out as required. This maximizes rider mobility when the third LINQ position is not being used.

Add three-position LINQ™ accessory compatibility to the REV™ G4 Summit™ models with the new X3 Triple LINQ™ Adapter System!

Fabricated from CNC machined aluminum extrusions and stainless steel shafts, the X3 is specifically designed to add triple LINQ™ accessory capability to the REV™ G4 Summit™ models

The X3 features independent LINQ™ attachment plates coupled to a parallel rail system, providing for full retractability

LINQ™ receptacles install easily into pre-drilled mounting holes on the independent attachment plates of the X3

The X3 system is designed to interface directly with the stock LINQ™ mounting holes in the tunnel for easy, no-drill installation

All aluminum components feature a black hard-coat finish for a highly durable, superb appearance

The forward attachment position of the X3 is compatible with all current LINQ™ fuel caddy units

The X3 Triple LINQ™ Adapter System features:

- **THREE-POSITION LINQ™ ACCESSORY COMPATIBILITY.** The X3 creates a third LINQ™ accessory attachment location by providing two independent – and retractable – attachment plates ahead of the stock positions. The third LINQ attachment location is fully compatible with all current LINQ™ fuel caddy units.
- **EASY INSTALLATION.** The X3 system interfaces directly with the stock LINQ™ mounting holes on the tunnel of every Ski-Doo® REV™ G4 Summit™ for easy, no-drill installation. All fasteners required for installation of the X3 system onto the tunnel are included.
- **PREMIUM QUALITY CONSTRUCTION.** The X3 features thick-wall, CNC machined custom aluminum extrusions and stainless steel shafts for high strength, precise fit, and premium quality.
- **INDUSTRIAL-QUALITY BLACK HARD-COAT FINISH.** All of the aluminum components used in the assembly of the X3 feature an industrial-quality black hard-coat finish that provides for a highly-durable, exceptional appearance.

MADE IN U.S.A.
