HELMET HANG'R™
HANDLEBAR-MOUNTED HELMET BRACKET

HELMET HANG'R™ *INSTALLED ON SKI-DOO® MXZ™*

Introducing the new *HELMET HANG'R™* from Up North Technologies. A safe, convenient, handlebar-mounted storage device for your helmet.

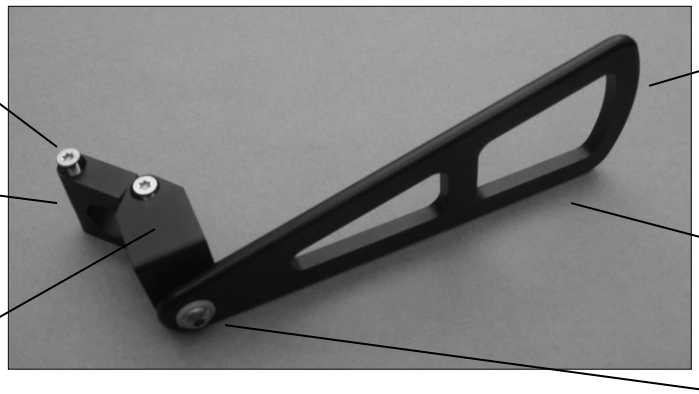
The *HELMET HANG'R™* provides a safe, convenient means of temporarily storing your helmet when taking a break on the trail or visiting your favorite pitstop. It features a uniquely designed swingarm that rotates down and out of the way when not in use, and easily rotates into a vertical position whenever you need it.

Precision-fabricated from lightweight aluminum, the HELMET HANG'R™ features a unique design that is compatible with standard 7/8" handlebars found on many powersports vehicles. Requiring only ½" of bar space for installation, the HELMET HANG'R™ features an anodized black finish for a superb appearance. It is a premium quality component that provides you with a safe, convenient means of temporary helmet storage.

Precision-fabricated from lightweight aluminum components

The ***HELMET HANG'R™*** is compatible with all 7/8" handlebars found on many powersports vehicles

An adjustable swivel bracket allows the position of the ***HELMET HANG'R™*** to be optimized regardless of handlebar angle or shape



The ***HELMET HANG'R™*** features an optimized end radius for a perfect fit on the inside of your helmet

The ***HELMET HANG'R™*** is anodized black for a superb appearance

A pre-tensioned pivot joint allows for easy rotation of the swingarm from the down to the up position

UP NORTH TECHNOLOGIES, INC.

The HELMET HANG'R™ features:

- **PREMIUM QUALITY CONSTRUCTION.** The ***HELMET HANG'R™*** is precision-machined from aluminum for lightweight and high quality. It also features stainless steel fasteners for unmatched corrosion resistance.
- **PRE-TENSIONED SWINGARM PIVOT. The *HELMET HANG'R™*** features a pre-tensioned pivot joint for the swingarm that provides for smooth rotation and infinite positioning.
- **BLACK ANODIZED FINISH.** The ***HELMET HANG'R™*** features a black anodized finish that provides for a superb appearance.
- **EASY INSTALLATION.** The ***HELMET HANG'R™*** is compatible with all 7/8" handlebars found on many powersports vehicles. It installs easily in minutes with two stainless steel fasteners.
- **COMPATIBLE WITH MULTIPLE HANDLEBAR SHAPES.** The ***HELMET HANG'R™*** features a swivel bracket that allows the orientation of the swingarm to be optimized regardless of the handlebar shape or angle.
- **OPTIMIZED SWINGARM RADIUS.** The ***HELMET HANG'R™*** features a swingarm end radius that has been optimized to closely match the inside of your helmet. This provides a stable, low-stress contact point for the helmet. In addition, a radius has been formed around the entire perimeter of the part to provide a smooth surface for helmet contact.
- **MULTIPLE PLACEMENT OPTIONS.** The ***HELMET HANG'R™*** requires only ½" of exposed handlebar space for installation.
